

# PLABI 6

Fully automatic processing line for the plastic comb-binding

The PLABI 6 makes plastic comb binders, inclusive pre-processing of the book blocks and fully automatic binding of it. The machine consists of several basic modules and can be customized.

## OPERATING PROCESS

PLABI 6 consists of 3 main groups:

**Comb binder production from roll or magazine**

### Book block

- gathering including binder perforation and corner perforation
- 4-side trimmer and corner rounding

### Binding

- cover feeding
- insertion of the binder in to binder perforation in 2-sec-cycle
